 AutoStore

AXJO GROUP – A CERTIFIED PRODUCTION PARTNER OF AUTOSTORE

*As a partner we can provide AutoStore's fully
automated Cube Storage System with the BINs solutions
manufactured locally at our state-of-the-art facility in Sweden.*

WHY AXJO GROUP?

.....

Choose Axjo Group for cutting-edge AutoStore solutions, delivered with precision, sustainability, and a focus on your unique needs!

INNOVATION, EFFICIENCY, AND SUSTAINABILITY are the driving forces behind our work in packaging solutions. We bring a wealth of experience in producing product with upcycled materials, supported by a strong in-house knowledge center. Our commitment is to ensure that our efforts have a positive impact on the technics and sustainability.

INNOVATION

EFFICIENCY

SUSTAINABILITY

What set us apart is our remarkable delivery precision, that is mostly 100% depending on product group. Partnering with us not only guarantees a competitive edge but also means benefiting from enhanced availability, swift delivery, short distances, and decades of expertise in polymer packaging solutions, all rooted in our commitment to sustainability. With us as partner, we can make a benefit for the sustainable work throughout the whole process, supported by a dedicated logistical and customer support team to meet needs of AutoStore Distributors and Customers.

IN-HOUSE EXPERTISE

AT AXJO GROUP, WE BRING EXTENSIVE EXPERIENCE in working with polymer materials. Our dedication to continuous development and a focus on new, upcycled materials is evident through our internal expertise. This ensures that we serve our customers with the best possible products tailored to their specific needs and short distances. Our Greenology lab, R&D center, and Tech center empower us to transform ideas into final products swiftly and with an unwavering commitment to quality. We are the European leader of compounding inhouse polymers from PIR and PCR to a full grade quality.

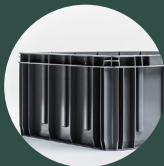

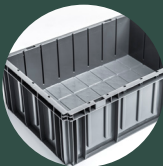

AUTOSTORE - MORE THAN A BOX

FOUNDED IN 1996, AutoStore™ is a technology company dedicated to developing order-fulfillment solutions for businesses, optimizing efficiency in the storage and retrieval of goods. Operating globally, AutoStore has implemented 1,250+ systems across 50 countries. All sales, distribution, design, installation, and service are managed by a network of qualified system integrators known as “partners.”

ALL GOODS ARE STORED IN STANDARDIZED, specially designed plastic containers called Bins. Every single Bin is identified by a unique number stored in the AutoStore™ Controller database and repeated with a label on the Bin. The system knows the location of every Bin. Bins are available in three sizes, 220- , 330- and 425-mm-tall.

PACKAGING SOLUTIONS MADE BY

PPS STORE IT SYSTEM

.....

STORE IT IS A NEW UNIQUE FRAME SYSTEM developed by Axjo for a producer of vertical storage lifts. The system consists of four different pieces which in combination can create a variety of ways to optimise the filling of trays for vertical storage machines.

PPS SMALL STORAGE SYSTEMS

.....

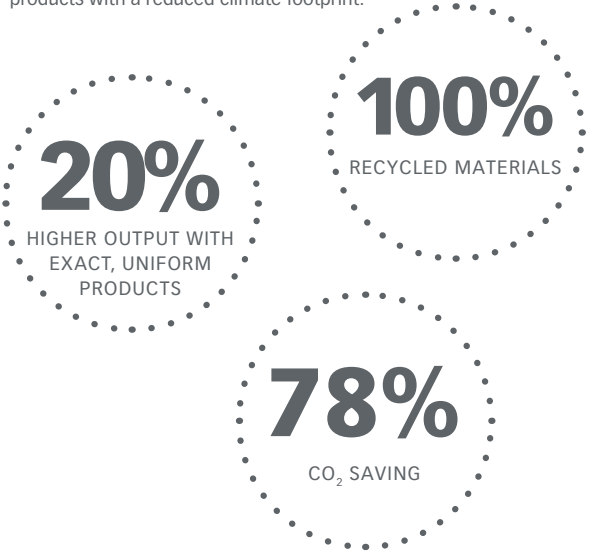

OUR COMPLETE and modern storage systems consist of storage and modular bins as well as storage trays, available in various designs that follow the current industry standard. The products are known under the name PPS, which is a part of the Axjo Group.

GREENOLOGY MATERIALS

.....

PRODUCT DEVELOPMENT with green materials is a matter of course for us at Axjo. By utilizing materials that have completed their life cycle, we can create new environmentally beneficial materials with improved properties. Replacing virgin raw materials through efficient recycling contributes to our ability to offer innovatively sustainable products with a reduced climate footprint.

Greenology®

THE GREENOLOGY CONCEPT consists of different parts. One of the most important is helping our customers reduce their carbon footprint.

A key initiative has been to work with leading manufacturers and research institutes to develop a method for utilising waste. We have a wide range of competencies in-house and are actively working on upcycling materials that will make our products more sustainable for all of us every day.

”This is what we call Greenology!”
